COMPANY

INTRODUCTION

Founded in 1984, Songul Lighting began its journey with the production of chandelier stones and decorative lighting products. Through continuous development, we have become one of Turkey's leading companies in the lighting industry. Our mission is to establish Songul Lighting as a globally recognized and used brand. We export our entirely domestic products to many parts of the world.

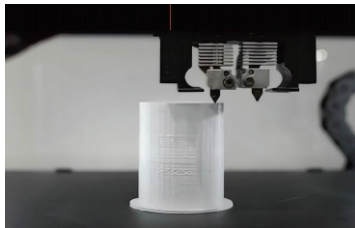

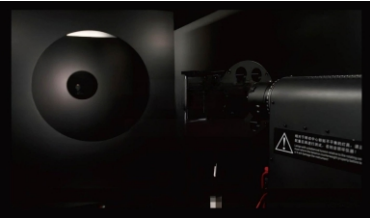

Songul Lighting stays attuned to the increasingly globalized world with our international branches. Since 2019, we have also held the distributorship of Asfour Crystal, the world's largest crystal manufacturer in Turkey. Inspired by the rise of Turkish politics, Songul Lighting aims to take a leading role as a Turkish company in the global lighting sector.

Our R&D efforts ensure we stay at the forefront of technological advancements, incorporating them into our product quality. Operating out of our 8,500m² production facility, our main goal is to provide exceptional service by collaborating with our professional staff, architects, designers, engineers, and customers. All our products meet ISO, TUV, and CE standards.

Customer satisfaction and quality are our top priorities. We strive to produce the most precise lighting solutions without compromising aesthetics or functionality by thoroughly analysing projects in collaboration with our clients.

Songul Lighting has left its mark on numerous projects both in Turkey and around the world. Our product range, equipment, and expertise allow us to meet diverse demands.
